

Usability Testing Script

Scenario

You are college student and find yourself not keeping up. You tend to forget about homework, assignments, and miss due dates. About to get enrolled in college in a few years. You get introduced to a new organization system/productivity app. Then you are asked to complete certain tasks on the app.

Task 1: View your CSCE190 class notes

Task 2: View assignments due for CSCE190

Task 3: Open any of your class Zoom link

Notes

What changes would you add to my application:

1. App does not contain a grading system, add a grading system.
2. Zoom should be integrated in the app, should not be an external link
3. Class schedule missing

What you need to keep the same for your application:

1. Keep the signing in system
2. Keep the assignment calendar
3. Keep the filtering button to filter
